DPCV1

The DPCV1 is a single board computer (SBC) designed around the JUMPtec® range of DIMM PC's. These are complete 386 or 586 modules which plug into the DPCV1 board and form a versatile SBC solution. Various memory options are available with DOS supplied as standard. The combination of display controller and touch screen controller on the DPCV1 are an ideal basis for the creation of a flexible user interface.
